

OM MATHUR

AI & Data Science Undergraduate

+91 8439500306 | ommathur03@gmail.com | ommathur.tech | linkedin.com/in/om-mathur306 | github.com/pythonom

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience developing machine learning, deep learning, computer vision, and data analytics solutions using Python. Built end-to-end applications ranging from medical image classification and disease prediction to full-stack analytics platforms. Experienced with TensorFlow, Scikit-learn, Flask, React, and data visualization. Seeking internship and entry-level opportunities to contribute to real-world AI and software engineering projects.

EDUCATION

Senior Secondary (Class 12th) Uttarakhand Board of School Education · Percentage: 85.4%	2020 – 2021
Bachelor of Computer Applications (Hons. with Research) – AI & Data Science K.R. Mangalam University, Gurugram · CGPA: 9.11 / 10	2025 – 2029

TECHNICAL SKILLS

- Programming Languages:** Python, Java, JavaScript, SQL
- Machine Learning & Deep Learning:** TensorFlow, Keras, Scikit-learn, OpenCV, Transfer Learning, CNN
- Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA
- Web Development:** Flask, React, HTML, CSS
- Databases:** MySQL, Supabase
- Tools:** Git, GitHub, VS Code, Figma

EXPERIENCE

Data Analyst Intern — CodeAlpha (Remote) - Performed exploratory data analysis on IPL datasets using Python, Pandas, and Matplotlib. - Cleaned and transformed raw cricket datasets to improve data quality and analysis. - Built insightful visualizations to identify player and team performance trends. - Generated analytical reports to communicate findings effectively. - Completed the internship within the scheduled one-month duration while following project milestones.	May 2026
--	----------

FEATURED PROJECTS

Skin Lesion Classification — TensorFlow, EfficientNetB0, Computer Vision, Deep Learning - Developed a deep learning model for multi-class skin lesion classification using transfer learning with EfficientNetB0. - Applied data preprocessing, augmentation, and fine-tuning to improve model generalization. - Evaluated performance using confusion matrix, precision, recall, F1-score, and accuracy metrics. - Saved the best-performing model using callbacks for reproducible deployment.
Lost Time Analyzer — React, Flask, Supabase, Machine Learning - Developed a full-stack analytics platform to monitor productivity and identify time-loss patterns. - Integrated machine learning to generate performance insights from user activity data. - Built responsive dashboards for visualizing productivity metrics and trends. - Designed scalable backend APIs with Flask and managed structured data using Supabase.

Heart Disease Prediction — *Python, Scikit-learn, Flask*

- Built an end-to-end machine learning pipeline for predicting heart disease risk from clinical data.
- Compared multiple classification models and selected the best-performing approach.
- Performed feature preprocessing, model evaluation, and prediction using real-world healthcare datasets.
- Developed a prediction interface to demonstrate practical deployment of the trained model.

IPL Cricket Analytics — *Python, Pandas, Matplotlib*

- Conducted comprehensive exploratory data analysis on IPL datasets during the CodeAlpha internship.
- Performed data cleaning, preprocessing, and statistical analysis.
- Created visual dashboards highlighting player performance, team trends, and tournament insights.
- Presented analytical findings through meaningful visualizations and reports.

CERTIFICATIONS

- Machine Learning & Deep Learning Bootcamp — K.R. Mangalam University
- Data Analyst Internship Certificate — CodeAlpha
- The Complete JavaScript Course 2025: From Zero to Expert! — Udemy

ACHIEVEMENTS

- Participant — DeepDataHackathon
- Participant — Aarambhthon
- Recipient — GitHub Student Developer Pack
- Successfully completed Machine Learning & Deep Learning Bootcamp
